

ICEmobile : Page Panel

This page last changed on Jan 17, 2013 by [philip.breau](#).

pagePanel

The pagePanel component will provide developers with a header/body/footer layout that is defined using facets. Facets for header and footer are optional.

Usage

```
<mobi:pagePanel id="panelConfirmation"
  style="width:300px">
  <f:facet name="header">
    <h:form id="headerFrm">
      <h:commandLink type="back" value="Back" styleClass="mobi-button mobi-button-back"
        action="#{bean.method}" rendered="#{bean.canGoBack}"/>
    </h:form>
  </f:facet>
  <f:facet name="body">
    <ui:include src="includes/body.xhtml"/>
  </f:facet>
  <f:facet name="footer">
    <h:panelGroup
      style="float:right;display:inline-block;margin: 5px 15px 0 0;">
      <h:form>
        <h:outputLink
          value="http://www.icemobile.org/demos.html" >
          <h:graphicImage library="images"
            name="icemobile_thumb.png"
            style="width:30px;height:30px;border:none;"/>
        </h:outputLink>
      </h:form>
    </h:panelGroup>
  </f:facet>
</mobi:pagePanel>
```
