

ICEmobile : Fetch Contact

This page last changed on Jan 17, 2013 by [philip.breau](#).

fetchContact

The Contact List component will invoke the native contact list interface to fetch various fields for a selected contact from the contact list database.

Usage

```
<mobi:fetchContact id="contact"
  label="Fetch Contacts"
  fields="name, email, phone"
  value="#{contactsBean.rawContact}"
  name="#{contactsBean.name}"
  email="#{contactsBean.email}"
  phone="#{contactsBean.phone}"/>
```
