

ICEmobile : Submit Notification

This page last changed on Jan 17, 2013 by [philip.breau](#).

Submit Notification

The Submit Notification component will popup a panel displaying a message to inform the user that there is a process undergoing and the background view will be disabled until this process is complete. It can be triggered either by a `commandButton` or a `menuButton`.

This component is styled for the devices that this project supports to most look and feel like the native view on the devices/desktop browsers. As for all mobi components, use `<mobi:deviceStylesheet` to have proper css loaded for each device.

Usage

Basic Use

```
<mobi:commandButton id="subNotEx1" value="submitBlockPopup" submitNotification="sn1"
    actionListener="#{input.testSubmitNotification}"/>
<mobi:submitNotification id="sn1">
    <h:outputText value="WORKING..."/>
</mobi:submitNotification>
```

can be used with or without `panelConfirmation` as well

```
<mobi:commandButton id="subNotEx1" value="submitBlockPopup"
    submitNotification="sn1"
    panelConfirmation="pn1"
    actionListener="#{input.testSubmitNotification}"/>
<mobi:submitNotification id="sn1">
    <h:outputText value="WORKING..."/>
</mobi:submitNotification>
<mobi:panelConfirmation id="pn1" title="AcceptOrCancel"
    message="this will confirmation panel will trigger working submitNotification panel"/>
```
